Contents

Akay M, Akay YM, Cheng P, Szeto HH: Investigating the effects of opioid drugs on electrocortical activity using wavelet transform 431
Akay YM → Akay M
Alavi FN → Taylor JG
Allard F → McFadyen BJ
Almon M, Spitzer H: Effect of degree of uniformity on predicted visual cortical response tuning curves 221
Amazeen PG, Schmidt RC, Turvey MT: Frequency detuning of the phase entrainment dynamics of visually coupled rhythmic movements 511
Anastasio TJ: The fractional-order dynamics of brainstem vestibulo-oculomotor neurons 69
Arndt PA, Mallot HA, Bülthoff HH: Human stereovision without localized image features 279

Başar E, Schürmann M: Functional aspects of evoked alpha and theta responses in humans and cats. Occipital recordings in "cross modality" experiments 175
Başar E → Schürmann M
Baddeley R → Fyfe C
Bartling C → Cruse H
Ben Maati ML → Cerf R
Biscay R → Jimenez JC
Böhler P → Spitzer M
Bomze IM: Lotka-Volterra equation and replicator dynamics: new issues in classification 447
Bour LJ → Heyden MJ van der
Bruner LJ, Harvey JR: The spike generation zone of the ampullary electroreceptor. I. Stimulus-response characteristics of a relaxation oscillator circuit model 371
Bruner LJ → Harvey JR
Bülthoff HH → Arndt PA

Canel A → Schiff ND
Cerf R, Ben Maati ML: Attractor characterization from scaled doublet structures: simulations for small data sets 357
Cheng P → Akay M
Cruse H, Bartling C, Cymbalyuk G, Dean J, Dreifert M: A modular artificial neural net for controlling a six-legged walking system 421
Cymbalyuk G → Cruse H

Dean J → Cruse H
Doi S → Nomura T
Dreifert M → Cruse H

Edelman S: Class similarity and viewpoint invariance in the recognition of 3D objects 207

Fischer B, Gezeck S, Huber W: The three-loop model: a neural network for the generation of saccadic reaction times 185
Flash T → Henis EA
Fukai T: A model cortical circuit for the storage of temporal sequences 321
Fukai T → Matsushita T
Fukumura N → Tani J
Fukunishi K, Murai N: Temporal coding in the guinea-pig auditory cortex as revealed by optical imaging and its pattern-time-series analysis 463
Fyfe C, Baddeley R: Non-linear data structure extraction using simple hebbian networks 533

Gerstner W → Wimbauer S
Gezeck S → Fischer B
Goto K → Tsuji T
Graham B, Willshaw D: Improving recall from an associative memory 337
Grimm K, Sauer AE: The high number of neurons contributes to the robustness of the locust flight-CPG against parameter variation 329
Guenther FH: A neural network model of speech acquisition and motor equivalent speech production 43

Harvey JR, Bruner LJ: The spike generation zone of the ampullary electroreceptor. II. Oscillator period noise and the limits of sensitivity 379
Harvey JR → Bruner LJ
Hemmen JL van → Wimbauer S
Henis EA, Flash T: Mechanisms underlying the generation of averaged modified trajectories 407
Heyden MJ van der, Hilgevoord AAJ, Bour LJ, Ongerboer de Visser BW: Modeling motoneuron firing properties: dependency on size and calcium dynamics 133
Hilgevoord AAJ → Heyden MJ van der
Hillermeier C, Kunstmann N, Rabus B, Tavan P: Topological feature maps with self-organized lateral connections: a population-coded, one-layer model of associative memory 103
Hillermeier C → Kunstmann N
Hong XH → Regan D
Huber W → Fischer B
Hughes HC → Nozawa G

Ito K → Tsuji T

Jimenez JC, Biscay R, Montoto O: Modeling the electroencephalogram by means of spatial spline smoothing and temporal autoregression 249

Kerszberg M, Masson C: Signal-induced selection among spontaneous oscillatory patterns in a model of honeybee olfactory glomeruli 481
Kischka U → Spitzer M
Kunstmann N, Hillermeier C, Rabus B, Tavan P: An associative memory that can form hypotheses: a phase-coded neural network 119
Kunstmann N → Hillermeier C

Labar DR → Schiff ND
Lánský P, Rospars JP: Ornstein-Uhlenbeck model neuron revisited 397
Lappe M, Rauschecker JP: Motion anisotropies and heading detection 261
Liley DTJ → Wright JJ
Löscher WN → Pilgram B

Mańdziuk J: Solving the N-Queens problem with a binary Hopfield-type network. Synchronous and asynchronous model 439
Mallot HA → Arndt PA
Masson C → Kerszberg M
Matsushita T, Moriyama S, Fukai T: Switching dynamics and the transient memory storage in a model enzyme network involving Ca^{2+}/calmodulin-dependent protein kinase II in synapses 497
McFadyen BJ, Winter DA, Allard F: Simulated control of unilateral, anticipatory locomotor adjustments during obstructed gait 151
Miyake S → Usui S
Montoto O → Jimenez JC
Morasso PG → Tsuji T
Moriyama S → Matsushita T
Murai N → Fukunishi K

Nakauchi S → Usui S
Nishii J, Uno Y, Suzuki R: Mathematical models for the swimming pattern of a lamprey. I. Analysis of collective oscillators with time-delayed interaction and multiple coupling 1
Nishii J, Uno Y, Suzuki R: Mathematical models for the swimming pattern of a lamprey. II. Control of the central pattern generator by the brainstem 11

Nomura T, Sato S, Doi S, Segundo JP, Stiber MD: Global bifurcation structure of a Bonhoeffer-van der Pol oscillator driven by periodic pulse trains. Comparison with data from a periodically inhibited biological pacemaker 55
Nomura T, Sato S, Doi S, Segundo JP, Stiber MD: A modified radial isochron clock with slow and fast dynamics as a model of pacemaker neurons. Global bifurcation structure when driven by periodic pulse trains 93
Nozawa G, Reuter-Lorenz PA, Hughes HC: Parallel and serial processes in the human oculomotor system: bimodal integration and express saccades 19

Ongerboer de Visser BW → Heyden MJ van der

Parnas H → Sivan E
Pfurtscheller → Pilgram B
Pilgram B, Schappacher W, Löscher WN, Pfurtscheller G: Application of the correlation integral to respiratory data of infants during REM sleep 543
Plamondon R: A kinematic theory of rapid human movements. Part I. Movement representation and generation 295
Plamondon R: A kinematic theory of rapid human movements. Part II. Movement time and control 309

Rabus B → Hillermeier C
Rabus B → Kunstmann N
Rauschecker JP → Lappe M
Regan D, Hong XH: Two models of the recognition and detection of texture-defined letters compared 389
Reuter-Lorenz PA → Nozawa G
Rospars JP → Lánský P

Sato S → Nomura T
Sauer AE → Grimm K
Schappacher W → Pilgram B
Schiff ND, Victor JD, Canel A, Labar DR: Characteristic nonlinearities of the 3/s ictal electroencephalogram identified by nonlinear autoregressive analysis 519
Schiff ND, Victor JD, Canel A: Nonlinear autoregressive analysis of the 3/s ictal electroencephalogram: implications for underlying dynamics 527
Schmidt RC → Amazeen PG
Schnörr C, Sprengel R: A nonlinear regularization approach to early vision 141
Schürmann M, Başar E: Topography of alpha and theta oscillatory responses upon auditory and visual stimuli in humans 161
Schürmann M → Başar E
Segel L → Sivan E
Segundo JP → Nomura T
Sivan E, Segel L, Parnas H: Modulated excitability: a new way to obtain bursting neurons 455
Spitzer H → Almon M
Spitzer M, Böhler P, Weisbrod M, Kischka U: A neural network model of phantom limbs 197
Sprengel R → Schnörr C
Stiber MD → Nomura T
Suzuki R → Nishii J
Szeto HH → Akay M

Tani J, Fukumura N: Embedding a grammatical description in deterministic chaos: an experiment in recurrent neural learning 365
Tavan P → Hillermeier C
Tavan P → Kunstmann N
Taylor JG, Alavi FN: A global competitive neural network 233
Tsuji T, Morasso PG, Goto K, Ito K: Human hand impedance characteristics during maintained posture 475
Turvey MT → Amazeen PG

Uno Y → Nishii J
Usui S, Nakauchi S, Miyake S: Acquisition of color opponent representation by a three-layered neural network model 35

Victor JD → Schiff ND

Weisbrod M → Spitzer M
Willshaw D → Graham B
Wimbauer S, Gerstner W, Hemmen JL van: Emergence of spatiotemporal receptive fields and its application to motion detection 81
Winter DA → McFadyen BJ
Wright JJ, Liley DTJ: Simulation of electrocortical waves 347
